💼 Experience

Nagarro
Senior Engineer
May 2022 - present
1 year

- Collaborated with an app architect to establish the foundation for a new React Native application, utilizing TypeScript to create a well-structured and organized codebase.
- Developed a design system for the application, ensuring consistent styling and support for multiple themes.
- Implemented state management using Redux-Tooklit in react-native app.
- Created a POC to visualize google fit data in a react native app.
- Worked on Sendbird API for video call integration.
- Conducted code reviews and provided feedback to other developers to ensure code quality and consistency

RPA Technologies Pvt. Ltd.
Software Developer
June 2018 - May 2022
4 years

- Responsible for website & app development from conceptualization stage to execution and maintenance.
- Responsible for writing scalable and maintainable code with best practices.
- Worked on API development and integration.
- Built Admin dashboards for multiple projects with data visualization.
- Worked on website deployment on cloud platforms like AWS/Google cloud.
- Worked on various third party integrations and APIs.

🔑 Key Projects / Involvements

Project Acai (React Native App)

Project Acai has a restaurant chain in Singapore. This app allows their customers to earn reward points based on their spending in any Project Acai restaurant. Customers can earn rewards in the form of virtual points and spend these virtual points to buy gift vouchers to redeem on their next purchase on Project Acai outlets and other third-party stores.

Roles & Responiblities :

- Back admin development to data management and data visualization.
- Created API to implement in react native app.
- Implemented state management using redux in react native app.
- API and Back admin deployment on AWS.
- Deployed Apps on Google Playstore and Apple App store.
- Working on post release feature requests and bug fixing.

SG Hired

SG Hired app offers security agencies to post job openings for security officer and allow agencies to track officers' live location when the officer is working.
Roles & Responiblities :

- Developed multi user authentication feature in the app.
- Integrated Stripe for payment processing.
- Local and remote notification Implementation using firebase.
- Implemented live location tracking functionality within the application.
- Configured multiple schemes for staging and production app.

👤 About me

I am a software developer having experience in mobile app development and web development. I use **React Native, Javascript/Typescript, PHP/Laravel** to design and develop scalable and maintainable products with quality code.

◎ Career Objective

Seeking a position to utilize my technical and analytical skills and abilities in the industry that offers me professional growth while being resourceful, innovative, and flexible in achieving the goals.

✕ Technical Expertise

- JavaScript
- PHP
- Laravel
- React Native
- HTML/CSS

✔ Skills / Expsoure

TypeScript · React · Redux · GraphQl · Node Js · Express js · Firebase · Rest Api · Jquery · AWS · SQL · CI/CD

⑂ Methodology / Approach

Component based architecture · Agile methodology · Design Patterns · MVC

🔧 Tools

Git · VS Code · Linux · Bitbucket · Open source APIs

🏛 Education

MCA
2019 - 2021
Computer Application
RGPV Bhopal
8.3 CGPA

B.Sc(CS)
2013 - 2016
